

## **TECHNICAL REQUIREMENTS (Small Venues and Events)**

Thank you for taking the time to review this information.  
These details will help optimize the audiences  
experience of Andy's stage show.

### **PERFORMANCE SPACE:**

- Clean, solid and level (wood floor is best).
- 15 ft. wide x 12 ft. deep. 10 ft minimum ceiling height.
- Easy access to audience for audience participation.
- Electrical outlet (within 30 ft. of performance space).

### **PERSONAL NEEDS:**

- A washroom nearby.
- 1 bottle of water or gatorade/show.
- A complimentary parking space for a mini van.

### **OUTDOOR EVENTS:**

Andy's show works best when sheltered from high winds, direct sun light and temperature extremes (Below 60 or above 85).

### **SOUND & LIGHTING:**

Good acoustics and lighting are essential to the overall quality of the show.  
Good overhead lighting is **REQUIRED!** (Andy must be able to see what he's juggling.)  
A follow spot with an operator is *optional*.

Andy provides a complete sound system for all small venues (500 people or less).  
Sponsor must provide sound system for large venues (500 people or more) and when  
Andy is traveling by air. If you provide a sound system, the minimum requirements  
are a microphone and a CD player (with someone to operate it).
